

The check is incomplete.

How complete is the check?

Incomplete

The review didn't use 2 of 3 automated scan result groups, and 1 question is still open.

What we need from you

Allow one more pass to settle whether the flagged dependency is used. Effort: Small

Why: Until then the scan result cannot be confirmed or cleared.

What was checked

Sign-in	Checked
Service API	Partly checked
Automated scans (3 ran)	1 of 3 result groups used; 1 failed

1 finding needs attention; the working summary on the next page lists it.

Summary

Dependency applicability and one survey leg remain unresolved.

No confirmed exploitable vulnerability was established. This is not a clean bill of health: some work remains incomplete.

Needs attention

Status	Finding	Where
2	Needs action Dependency applicability remains unresolved.	

Open questions

Status	Claim	Id
Not revisited	The flagged dependency is reachable	c2

Overturned by the review

Status	Claim	Id
Refuted	An unauthenticated caller can bypass sign-in	c1

Examined and sound

Finding	What was sound
1	The proposed authentication bypass was refuted.

Not covered

- 2 of 3 scanner result groups have no assessment and no set-aside. Unassessed is not cleared.
- 1 claim still open: The flagged dependency is reachable.
- Scans that failed: secrets.
- Areas only partly checked: Service API.
- Scanner inventory: 1 of 3 result groups assessed by a claim or finding, 0 set aside, 2 unaccounted.

Recorded coverage

Subject	Status	Recorded facts
execute/leg-1 · security-reviewer	complete	One attempt: 65b4760a-4000-4000-8000-100000000001
execute/leg-2 · security-reviewer	partial	Two attempts: 65b4760a-4000-4000-8000-100000000002, 65b4760a-4000-4000-8000-100000000003
Scanner inventory	Accounting	1 of 3 groups assessed by a claim or finding; 0 set aside; 2 unaccounted

Findings

1. The proposed authentication bypass was refuted.

Sound c1

2. Dependency applicability remains unresolved.

Needs action c2

Scanner inventory is separate from review judgment. Unknown severity remains unknown; a published fix boundary requires an applicability check.

3 of 3 groups listed; 1002 stored occurrences represented by 3 sample rows · sast, sca reported 1002 findings · 1001 high, 1 unknown

sast · scan-sast · complete

sca · scan-sca · complete

secrets · scan-failed · failed · Scanner unavailable

About this document

Produced by	Painted Wolf Code, paintedwolf.ai

Completed	4 September 2026, 12:00 UTC
Scanners	sast, sca

This document is a projection of the run's durable records — its closeout, review verdicts, scan findings, evidence ledger, and visuals — rendered deterministically: the same records produce byte-identical output. The records, not the document, are the record of the outcome.
