

The check is complete.

How complete is the check?

Complete

Everything planned was checked. Nothing is open.

What we need from you

Nothing. This is for your information.

The working summary starts on the next page.

Summary

Two error-level rules fire across the build scripts; nothing else in this sweep is actionable. The nightly sweep ran two external scanners whose severity vocabulary differs from the one the app grades with. Nothing here was triaged; the rows below are the scanners' own output, grouped by rule.

Not covered
– Not examined, per the closeout: No triage ran. These rows are scanner output, not reviewed findings.

Assessment

Nightly scan

The nightly sweep ran two external scanners whose severity vocabulary is error / warning / note rather than the levels the app grades with. Nothing here was adjudicated; the rows below are the scanners' own output, grouped by rule.

Scanner findings

This document is a projection of the run's durable records — its closeout, review verdicts, scan findings, evidence ledger, and visuals — rendered deterministically: the same records produce byte-identical output. The records, not the document, are the record of the outcome.
